# OUR VISION

Our vision is to be a one-stop solution in the construction sector with the backing of our clients' trust, support & by being capable to consistently deliver the committed quality through our services, values & integrity.

# OUR MISSION

Our mission is to build world-class infrastructure in India. We aim to provide quality workmanship, customer service and maintain the highest level of professionalism, honesty and fairness in our relationships with our clients, employees and vendors. We wish to grow by continually providing useful and significant products, services, and solutions to markets we already serve – and to expand in to new areas that build on our competencies.

# CORE IDEOLOGIES

The foundation of Sarfam Buildcon's success and continual development lies in preserving the trust of all our stakeholders.

## SAFETY

We plan safety into every aspect of our work and strive to maintain a very secure work environment for our team

## INTEGRITY

We conduct our business with highest level of ethics and honesty and propagate this value system throughout the organization

## TEAM WORK

Our culture of teamwork allows us to work together within the company and enables us to deliver better solutions so that goals can be accomplished collectively.

## TRANSPERANCY

We strive to earn and build our reputation rather than merely manage it, we make our actions match our words.

## CORE IDEOLOGIES

### ACCOUNTABILITY

Relations within the company are based on trust, which is the cornerstone of authenticity

### TRUST

We take full responsibility for our decisions and actions

## Our Managing Director,

*“My aspirations are not limited to myself for my company, I always believe in the bigger picture and that for me is my nation. I dream of seeing India as a country with exemplary infrastructure and I wish to be apart of this mammoth task in every was possible”*

Mr. Yash Saraf

## COMMITMENT TO CLIENTS

The key to success revolves around the two very important Cs in any business irrespective of its nature.

Clients&Consistency.

The client is the focal point that acts as a fulcrum to the existence of the business while consistency ensures standard and quality with periodic improvements and eventually growth.

The trust we garner from our clients is the foundation of our exemplary performance and we always believe in putting the clients needs before us as they pave the road to success for us. We take pride in our capabilities to cater all the needs of our clients with utmost care and we also acknowledge all the details and specifications so as to design a successful plan.

We believe in a pro active approach to all aspects of our business, but in particular to quality, safety and delivery. This in turn enables us to give our clients the confidence and peace of mind throughout the process of planning till execution of the project, until we receive their valuable feedback. Our technical expertise makes us the problem solvers while being economic and efficient.

**SARFAM BUILDCON  
PRIVATE LIMITED**

BUILDING A LEAD

## THE 5 FOLD APPROACH

### RUDIMENTARY PHASE

We believe it is extremely essential to listen to and understand the exact requirements of the clients so that a precise plan can be formulated.

### BUILD THE TEAM

We hire and assign a highly experienced and committed team to every project that comes our way to make a very comprehensive plan, taking in to consideration all the important technical aspects.

### CONCEPTION

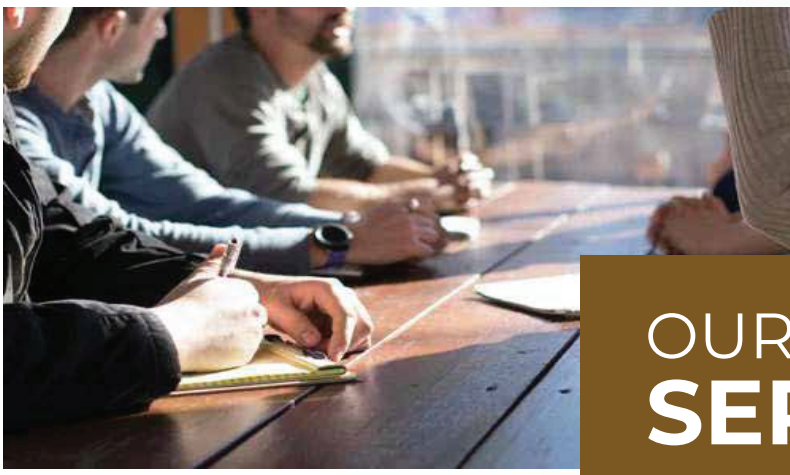

This is the very beginning of any construction process. Here in we formulate the plan and proposal. This is the first stage of any kind of development. In this phase the ideas are most fluid and several options are evaluated. This roughly includes identifying the site, pre-design and more

### DESIGN & PRE CONSTRUCTION

This stage lies at the intersection of the clients brief and the practicality of execution. A set of alternative designs are created and submitted to the clients for approval. Following which a final plan is formulated and we're headed towards our final construction plan. Prior to that, we rope in an entire project management team comprising of various experts to act as pillars for every project

### EXECUTION & FEEDBACK

It is imperative for us to procure the best quality material and put our state of the art machinery into motion. We commence the construction process and divide the project into several stages that also prove to be milestones. Regular client meetings are organized on and off the site to discuss the progress and the clients are always kept in loop. We wait for the valuable feedback during and after the completion of every project and we strive to build an everlasting relationship with all our clients

# OUR BEST SERVICES

## Fabrication

Rising to meet the challenges of the future bright with possibilities.

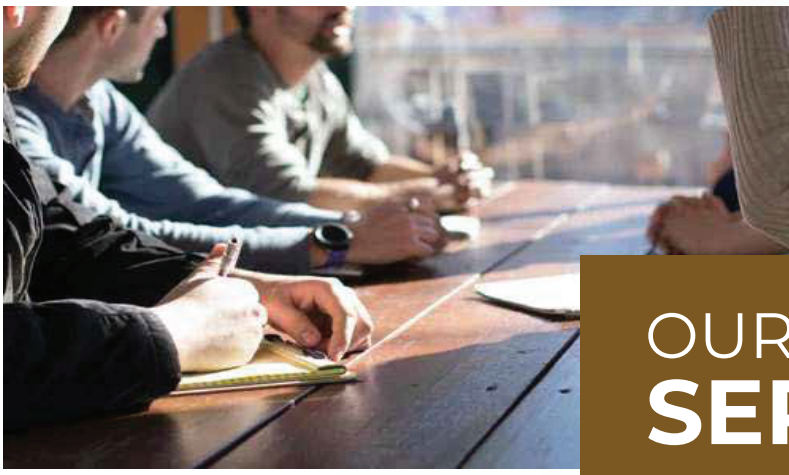

Sarfam Bulidcon Private Limited was incorporated in the year 2018 & started constructing business then, the company has vast experience in the field of construction, interior and architectures. The vision and mission of the company has involved in providing logical and efficient construction across india an providing prompt services to the industry.

## Consulting

Rising to meet the challenges of the future bright with possibilities.

Spire provides comprehensive construction management consulting services. Our construction consultants possess the engineering and construction experience to provide real world, cost-effective solutions to the everyday challenges that owners, contractors, engineers and architects face throughout the construction process.

## OUR BEST SERVICES

### Construction

Rising to meet the challenges of the future bright with possibilities.

---

There are few industries more complex and competitive than the construction industry. Whether you are in the construction industry. Whether you are in the business of construction buildings, Infrastructure or both. you will appreciate that large scale construction is a mixture of many smaller projects. Which is a feat of multitasking in its own right.

### Interior Design

Rising to meet the challenges of the future bright with possibilities.

---

Designers craft spaces that anticipate our needs and appeal to our emotions while pulling from broad set of skills and technical knowledge. Interior design has changed dramatically since the early 20th century when it was just a beginning to emerge as a profession.
